Direct Deposit Fields Explanation

Check Example

The Routing Number and Account Number can be obtained from your check. At the bottom of a check, there are three groups of numbers. The first group contains the nine digit routing number, the second provides the account number, and the third is the check number.

1 - Routing Number

2 - Account Number

NOTE: Do not enter the check number as part of the Account Number

Routing Number

- This is always the first nine digits at the bottom of the check provided from your bank.
- May also be referred to as Transit Number.
- If you are unsure about the number, please check with your bank. An incorrect Routing Number will delay your Direct Deposit enrollment.
- Never use the number on your debit card as the Routing OR Account number.

Account Number

- This number is typically the second series of numbers at the bottom of the check provided from your bank.
- Do not include the series of numbers that represent the check number. The check number is not part of your account number. See check example.

Account Type

- Choose Checking or Savings

Deposit Type

- Choose Amount, Percent or Balance
- If you are entering Direct Deposit information for the first time, you must select Balance for Deposit Type.

Amount or Percent

- If you chose Amount for Deposit Type then enter the dollar amount you want deposited.
- If you chose Percent for Deposit Type then enter the percentage of your check (less than 100) that you want deposited.
- This field must be blank for Deposit Type Balance

Deposit Order

- Use this field to determine what order you would like deposits made. When using the Balance Deposit Type, the system will automatically assign priority 999 to ensure it is the last deposit processed.
- For Percent and Amount Deposit Types, the lowest deposit order will be the one that is deposited first and so on in the order of priority with any remaining going into the Balance account.
